

IOSH Risk Assessment in Practice

1-day course

Aim

To provide delegates with a comprehensive introduction to the key health, safety and welfare issues affecting all employers and users of premises, and how to carry out risk assessments. The course is intended for anyone who needs to carry out general health and safety risk assessments in a range of working environments, such as offices, retail premises, light industrial, etc. This includes office managers with responsibility for others.

This is an IOSH accredited course which will involve passing a 30-minute assessment based on multiple choice questions.

Objectives

By the end of this course you will be able to describe:

The importance and principles of the management of Health & Safety at work
The background and key principles of a comprehensive range of relevant legislation and regulations
Why good Health & Safety is good business
The role of Assessment through UK Health & Safety Legislation
How to develop a Safety Culture
Health & Safety Risk Assessments, where they apply and how to produce them and carry them out
How to inspect & audit to ensure compliance
The importance of consultation with employees
The implications of prosecutions
A sample Health & Safety policy statement

Course description

A bewildering range of Acts of Parliament, Regulations, Approved Codes of Practice and Guidance Notes form the framework of Health & Safety Compliance in the UK. A number of well-publicised prosecutions, civil actions and government initiatives are increasingly focussing attention on the human and financial cost of non-compliance – no one can afford to ignore these, from the Board downwards.

This intensive and comprehensively documented course provides up-to-date guidance for all levels, irrespective of the size of the organisation.

Course content

Full documentation and assessment checklists provided
